INDEX OF SUBJECTS AND AUTHORS

Accidental pneumothorax complicating an attempt to induce artificial pneumothorax, 168

Acetic acid and other acids, Precipitation with. The chemical composition of the active principle of tuberculin, II, 398

Acid, acetic, and other acids, Precipitation with. The chemical composition of the active principle of tuberculin, II, 398

—— hydrolysis of tuberculin. The chemical composition of the active principle of tuberculin, VI, 441

Acid-fastness of tubercle bacilli, An investigation of the, 550

Acids, fatty, unsaturated, The action of, on tubercle bacilli, 84

Action, bactericidal, of ultraviolet light on the tubercle bacillus, The, 470

—— of unsaturated fatty acids on tubercle bacilli, The, 84

Active immunization of guinea pigs by tuberculous urinary antigens, Attempts at, 463

—— principle is a protein, The evidence that the. The chemical composition of the active principle of tuberculin, VII, 448

Active principle of tuberculin, The chemical composition of the. I. A non-protein medium suitable for the production of tuberculin in large quantity, 393

—— —— —— ——, —— —— —— ——. II. Precipitation with acetic acid and other acids, 398

—— —— —— ——, —— —— —— ——. III. Experiments on dialysis, 404

—— —— —— ——, —— —— —— ——. IV. Ammonium-sulphate precipitation of the proteins of tuberculin, 408

Active principle of tuberculin, The chemical composition of the. V. The effect of proteolytic enzymes on tuberculin proteins and the activity of tuberculin, 431

—— —— —— ——, —— —— —— ——. VI. Acid hydrolysis of tuberculin, 441

—— —— —— ——, —— —— —— ——. VII. The evidence that the active principle is a protein, 448

Active principles of tuberculin prepared from non-protein substrates. Studies in tuberculosis, VII, 454

Activity of tuberculin, The effect of proteolytic enzymes on tuberculin proteins and the. The chemical composition of the active principle of tuberculin, V, 431

Acute tuberculous lymphadenitis complicating pulmonary tuberculosis, 350

Adaptation of the Kolmer Wassermann technique to tuberculosis complement fixation, An, 243

Adenitis, cervical, Tuberculous, 489

Adult, Pulmonary hilum tuberculosis in the, 37

Ammonium-sulphate precipitation of the proteins of tuberculin. The chemical composition of the active principle of tuberculin, IV, 408

Antigen, Dreyer's defatted, Unsuccessful attempts to cure or prevent tuberculosis in guinea pigs with, 114

Antigens, urinary, tuberculous, active immunization of guinea pigs by, Attempts at, 462

ARONSON, JOSEPH D. The standardization of tuberculin, 263

Artificial pneumothorax, 156, 538

—— ——, Accidental pneumothorax complicating an attempt to induce, 168

—— —— patients, The cutaneous (Moro) tuberculin test in, 357

Atmospheres rich in oxygen, The effects of, on normal rabbits and on rabbits with pulmonary tuberculosis, 293
Attempt to establish tissue-specific strains of tubercle bacilli, An, 92
Attempts at active immunization of guinea pigs by tuberculous urinary antigens, 463
——, Unsuccessful, to cure or prevent tuberculosis in guinea pigs with Dreyer's defatted antigen, 114

Bacilli, tubercle, acid-fastness of, An investigation of the, 550
——, ——, action of unsaturated fatty acids on, The, 84
——, ——, dead, Resistance to tuberculous infection of guinea pigs rendered skin sensitive with, 379
——, ——, single colonies of, A method for obtaining, 90
——, ——, The reaction and growth curves of cultures of, 107
——, ——, tissue-specific strains of, An attempt to establish, 92
Bacillus, tubercle, Experimental intratracheal infection with the, 62
——, ——, The bactericidal action of ultraviolet light on the, 470
Bactericidal action of ultraviolet light on the tubercle bacillus, The, 470
BARACH, ALVAN L. The effects of atmospheres rich in oxygen on normal rabbits and on rabbits with pulmonary tuberculosis, 293
BECKWITH, T. D., AND MILLZNER, R. J. Experimental intratracheal infection with the tubercle bacillus, 62
Bilateral lung suppuration, treatment of, The, 225
BITTMAN, FLORENCE R., HAZEN, ETHEL LEE, AND NEVIN, MARY. Unsuccessful attempts to cure or prevent tuberculosis in guinea pigs with Dreyer's defatted antigen, 114
BOISSEVAIN, CHARLES H. A method for obtaining single colonies of tubercle bacilli, 90
——, —— ——. The action of unsaturated fatty acids on tubercle bacilli, 84
BRAY, H. A. The tension theory of pleuritic pain, 14
Breath-holding tests, A comparison of, with vital capacity in health and disease, 54
BRUNS, EARL H. The modern sanatorium treatment of tuberculosis as applied in a large government institution, 193

Care of the tuberculosis preventorium child, The, 524
CARROLL, WILLIAM E. Errors in the diagnosis of tuberculosis in children, 479
CARTER, H. G. Inherited immunity in tuberculosis, 373
Case of limited miliary tuberculosis, A, 211
Cause of death, Tuberculosis the fifth, in the United States. Editorial, 183
Cervical adenitis, Tuberculous, 489
Chemical composition of the active principle of tuberculin, The. I. A non-protein medium suitable for the production of tuberculin in large quantity, 393
—— —— —— —— —— —— —— ——, ——. II. Precipitation with acetic acid and other acids, 398
—— —— —— —— —— —— —— ——, ——. III. Experiments on dialysis, 404
—— —— —— —— —— —— —— ——, ——. IV. Ammonium-sulphate precipitation of the proteins of tuberculin, 408
—— —— —— —— —— —— —— ——, ——. V. The effect of proteolytic enzymes on tuberculin proteins and the activity of tuberculin, 431
—— —— —— —— —— —— —— ——, ——. VI. Acid hydrolysis of tuberculin, 441
—— —— —— —— —— —— —— ——, ——. VII. The evidence that the active principle is a protein, 448
Child, preventorium, tuberculosis, The care of the, 524
Childhood, tuberculosis in, Latent, with reference to tuberculin reactions, clinical findings and X-ray studies. Studies in tuberculosis, VI, 124

Children having masked juvenile tuberculosis, The vital capacity of the lungs of, 278
——, tuberculosis in, diagnosis of, Errors in the, 479
——, underweight, extremely, A tuberculosis survey of, 506
——, vital capacity of the lungs of, A consideration of the extent of the normal variability of the, 272
Chronic miliary tuberculosis of lungs with resolution, 52
Cities, 23 large, of the United States, death-rates from tuberculosis in, A comparison of the, 94
Climate, winter, The influence of, on pulmonary tuberculosis in the United States, 366
Clinical experiences indicating the importance of timely radical local rest (thoracoplasty) in pulmonary tuberculosis, 327
—— findings, and X-ray studies, Latent tuberculosis in childhood, with reference to tuberculin reactions. Studies in tuberculosis, VI, 124
Clinics and follow-up work after sanatorium treatment of tuberculosis, 529
Colonies, single, of tubercle bacilli, A method for obtaining, 90
Comparison of breath-holding tests with vital capacity in health and disease, A, 54
—— —— the death-rates from tuberculosis in 23 large cities of the United States, A, 94
Complement fixation, tuberculosis, An adaptation of the Kolmer Wassermann technique to, 243
Complicating an attempt to induce artificial pneumothorax, Accidental pneumothorax, 168
—— pulmonary tuberculosis, Acute tuberculous lymphadenitis, 350
Composition, chemical, The, of the active principle of tuberculin. I. A non-protein medium suitable for the production of tuberculin in large quantity, 393
Composition, chemical, The, of the active principle of tuberculin. II. Precipitation with acetic acid and other acids, 398
——, ——, ——, —— —— —— —— —— ——. III. Experiments on dialysis, 404
——, ——, ——, —— —— —— —— —— ——. IV. Ammonium-sulphate precipitation of the proteins of tuberculin, 408
——, ——, ——, —— —— —— —— —— ——. V. The effect of proteolytic enzymes on tuberculin proteins and the activity of tuberculin, 431
——, ——, ——, —— —— —— —— —— ——. VI. Acid hydrolysis of tuberculin, 441
——, ——, ——, —— —— —— —— —— ——. VII. The evidence that the active principle is a protein, 448
"Concealed" tuberculosis, Remarks on "occult" or, 47
Consideration of the extent of the normal variability of the vital capacity of the lungs of children, A, 272
Cultures of tubercle bacilli, The reaction and growth curves of, 107
Cure or prevent tuberculosis in guinea pigs with Dreyer's defatted antigen, Unsuccessful attempts to, 114
Curves, The reaction and growth, of cultures of tubercle bacilli, 107
Cutaneous (Moro) tuberculin test in artificial pneumothorax patients, The, 357

Dead tubercle bacilli, Resistance to tuberculous infection of guinea pigs rendered skin sensitive with, 379
Death, Tuberculosis the fifth cause of, in the United States. Editorial, 183
Death-rates from tuberculosis in 23 large cities of the United States, A comparison of the, 94
Decline of tuberculosis mortality in the United States and the influence of the influenza epidemic of 1918, The. Editorial, 385
Defatted antigen, Dreyer's, Unsuccessful attempts to cure or prevent tuberculosis in guinea pigs with, 114

De Witt, Lydia M., and Wells, H. Gideon. An attempt to establish tissue-specific strains of tubercle bacilli, 92
Diagnosis of tuberculosis in children, Errors in the, 479
Dialysis, Experiments on. The chemical composition of the active principle of tuberculin, III, 404
Dienes, L., and Schoenheit, E. W. Resistance to tuberculous infection of guinea pigs rendered skin sensitive to tuberculous infection, 379
Disease, health and, A comparison of breath-holding tests with vital capacity in, 54
Dreyer's defatted antigen, Unsuccessful attempts to cure or prevent tuberculosis in guinea pigs with, 114
Dubrow, James L. Clinical experiences indicating the importance of timely radical local rest (thoracoplasty) in pulmonary tuberculosis, 327

Eberson, Frederick. Studies in tuberculosis. VI. Latent tuberculosis in childhood, with reference to tuberculin reactions, clinical findings and X-ray studies, 124
——, ——. —— —— ——. VII. Active principles of tuberculin prepared from non-protein substrates, 454
Editorial. The decline of tuberculosis mortality in the United States and the influence of the influenza epidemic of 1918, 385
——. Tuberculosis the fifth cause of death in the United States, 183
——. Urban and rural trends of tuberculosis mortality contrasted, 284
Effect of proteolytic enzymes on tuberculin protein and the activity of tuberculin, The. The chemical composition of the active principle of tuberculin, V, 431
Effects of atmospheres rich in oxygen on normal rabbits and on rabbits with pulmonary tuberculosis, The, 293
Enright, John J. Attempts at active immunization of guinea pigs by tuberculous urinary antigens, 463
Enzymes, proteolytic, The effect of, on tuberculin proteins and the activity of tuberculin. The chemical composition of the active principle of tuberculin, V, 431
Epidemic, influenza, of 1918, The decline of tuberculosis mortality in the United States and the influence of the. Editorial, 385
Errors in the diagnosis of tuberculosis in children, 479
Experiences, Clinical, indicating the importance of timely radical local rest (thoracoplasty) in pulmonary tuberculosis, 327
Experimental intratracheal infection with the tubercle bacillus, 62
—— tuberculosis, vital staining in, Studies on, 97
Experiments on dialysis. The chemical composition of the active principle of tuberculin, III, 404
Extent of the normal variability of the vital capacity of the lungs of children, A consideration of the, 272
Extrapleural thoracoplasty, 149
Extremely underweight children, A tuberculosis survey of, 506

Falisi, J. Vincent. A case of limited miliary tuberculosis, 211
Fatty, acids, unsaturated, The action of, on tubercle bacilli, 84
Fifth cause of death in the United States, Tuberculosis the. Editorial, 183
Follow-up work after sanatorium treatment of tuberculosis, Clinics and, 529
Freed, Harold, and Webb, J. B. Pulmonary hilum tuberculosis in the adult, 37
Function, gastric, in pulmonary tuberculosis, Studies on, 317
